Select Superior Signal, Inc. SAE Class 1 LED and strobe products are stocked at Traffic Supply, Inc. in bolt down and magnetic portable models.

Tech notes:

- SAE Class 1 lights have a minimum 4x the intensity of a Class 2 light, which itself is a minimum of 2.5x the intensity of a SAE Class 3 light.
- SAE Class 3 products should not be used for on highway vehicle lighting.
- Magnetic mount lights include a power cord and a switch mounted on the cigarette lighter power plug.
- Permanent mount lights come with nothing more than a short pigtail. Mounting hardware, switches and cable are not provided.
- Most LED lights can be operated 12-24vdc. See PI sheets for specifics of each light.
- Many other Superior Signal, Inc. beacons, mini light bars, work lights and LED modules are available by special order.
