REPLACEMENT PLASTIC POCKET

UNIVERSAL SIGN CLAMP

12" HEIGHT EXTENDER

**48" roll up signs off increased visibility over barricade mounted signs, and are usually required when used on roads with a speed greater than 40 mph.**

## Tech notes:

- Non-reflective vinyl roll up signs are less expensive and a great choice for use during daylight hours. Reflective roll up signs are good for use day or night.
- Although they may look the same, all roll up signs are not equal. JBC's DuraViz ink technology produces a sign that can be cleaned with almost anything, and not damage the legend.
- In addition to the many signs we stock, 36" signs are available by special order and almost any custom legend can be made.
- In addition to the clamp mount stays (think kite sticks), we also stock heavy duty stays for use with snap in place sign stand systems, like Traffic Zephyr.
