STEEL DRIVE RIVET
ALUMINUM DRIVE RIVET

Traffic Supply, Inc. carries a wide selection of hard to find sign mounting hardware. From stainless steel banding to u-bolts and posts caps, we have it, and in quantities to get the job done!

Tech notes:

- Most side mount brackets can be bolted, screwed or clamped to a wall, post, pole or column.
- Standard hex and vandal resistant bolts are stocked for mounting signs to square or u-channel posts.
- Theft resistant saddle bolts will work with banding saddles and u-bolts..
- Aluminum and Steel drive rivets are stocked for use with square and u-channel post, and are installed with nothing more than a hammer.
- Aluminum rivets are easier to drive and work great for replacing or adding signs to an existing post.
- Steel rivets make a more secure connection, but can be troublesome to install on an existing sign post.
