Traffic Supply, Inc. stocks heavy duty 1/8" thick polyethylene parking lot and curb stencils. Our selection includes popular legends, symbols, arrows, number and letter kits. For small projects, inexpensive paper letter and number kits are stocked. Aluminum paint and thermo stencils, and custom oilboard stencils are available by special order.

Tech notes:

- Application of stencil coat or misting the stencils with a product like WD40 prior to use, will help keep paint from adhering to the stencil.
- Stencils should be stored flat when not in use.
- With reasonable care, plastic and aluminum stencils should last many years. Although paper and oilboard stencils are not near as durable as plastic and aluminum, they are reuseable.
