[TrafficSupplyInc.com](http://TrafficSupplyInc.com)

**Traffic Supply, Inc stocks a wide variety of reflective and skid resistant tapes.**

## Tech notes:

- Engineering grade (EG) reflective tapes are a good choice for pedestrian pathway and slow speed parking lot use.
- High Intensity Prismatic (HIP) reflective tapes are brighter than conventional Engineering grade reflective material.
- Reflective street tape is often used to temporarily mark lane and limit lines until permanent markings can be applied.
- Grip tape can be used to provide visual warning in addition to slip resistance to many surfaces, including concrete.
- Near waterproof grip tape for use in continually wet areas is available by special order.
- All tapes are sold by the roll, with the exception of HIP reflective tapes which are also sold by the foot.
- Many other sizes and colors of tapes available by special order.
