**American Traffic Products water based parking lot and highway striping paint is stocked in convenient five gallon buckets, and in one gallon buckets for small projects.**

## **Tech notes:**

- When properly applied with airless equipment, expect to get about 265 square feet (or 800 linear feet of 4" line) out of each five gallon bucket.
- All paint colors available in rapid dry formulas for street work with minimal downtime waiting for paint to dry.
- White and yellow in 5 gallon pails are also stocked in standard dry, which is less expensive, slightly less opaque and has a significantly longer dry time.
- 55 gallon drums of ATPI paint are available by special order.
- Black "Road Grade" Skidguard is stocked in 5 gallon pails and can be applied to concrete or steel surfaces. Less aggressive "Walking Grade" and color tinted Skidguard available by special order.
